Project Visuals

Payment

Start

The user browses to the webpage.

Select payment

The user clicks on the link to the payment page

Select package

Next step is to choose which packages he/she wants to have, Basic, Premium or Great Premium.

Enter credit card information

The credit card information is all the information on the credit card that you need for paying.

Submit

When the user is finished then he/she submits the information.

Receive information:

The system receives the information about payment

Send request:

The system sends a request to the bank

Receive request

The bank receives the request

Rejected OR Transfer money

The bank checks to see if there is money in the account, if not, they reject, if yes they transfer the money.

Send result

The bank sends the result (If it's rejected or transferred) to the system.

Receive result

The system receives the result.

XOR

If the result was okay (The money is transferred), the system updates the account.

If the result wasn't okay (No money), the system sends an e-mail.

Update account

The system updates the package information that is connected to the specific user account.

Send e-mail

An e-mail is sent to the user with information about the payment.

Receive e-mail

The user receives an e-mail.

End

The process ends.

Account Activation

Start

This process starts when the user opens the New Member sign up link.

Sign up

The user fills out the form with personal information, account information and clicks on the button.

The personal information is first name, last name, e-mail, address and phone number.

The account information includes Username and password.

Save information

In this step all the information that the user has written is saved to the database.

Send E-mail

The system sends an e-mail to the user with information about activating the account. There is also a link to activate.

Receive E-mail

The user receives an e-mail.

Activate

The user clicks on the link in the e-mail.

Activate account

The system activates the account and creates a status for the specific user.

Send confirmation e-mail

The system sends an e-mail to the user that confirms that the account is activated.

Receive e-mail

The user receives confirmation e-mail.

End

The process ends.
